

# WISL

**Waterloo inspection hatch**

# Return grids

## Inspection hatch WISL

### Introduction

Waterloo perforated inspection grilles are suitable for ceiling applications. They are designed to meet all exhaust applications and are ideal for the inlet of recirculated air from fancoil units. Through a click mechanism the grille can be easily opened and closed making it also an inspection hatch. Optionally the grille can be equipped with a wire filter, it is also possible to replace the perforated part with a closed plate so that the grille only serves as an inspection hatch.

### Product Description

- WISL Waterloo inspection hatch
- P Perforated interior
- B Closed interior (optional) White G2
- VF-P200 wire filter (optional)

### Attachment

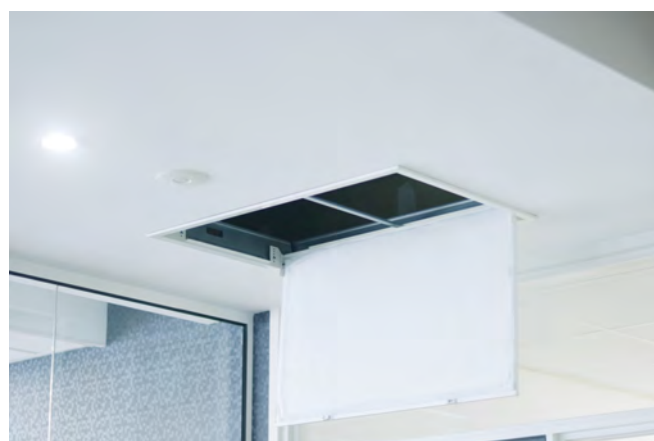

- ST - blind screw fixing (standard)
